# Performance & Uptime

An Overview of Your Website's Uptime & Performance Data From Google PageSpeed Insights.

## Uptime

Downtime happens more often than people think. That's why we constantly monitor your website to make sure that we are the first to know that your website is down, so we can fix it before your consumers even notice it!

<b>Status</b>	Up
<b>Uptime</b>	100.00%

## Performance

When a customer or a visitor opens the website for the first time, they expect it to load quickly (within 3 seconds). Bear in mind that first impressions are vital for businesses on the web. Speed plays a decisive role in how audiences perceive a brand on the web. Obtaining a perfect Google PageSpeed Score (100/100) for your site is almost impossible, but we are constantly working towards this goal.

<b>Response Time</b>	3418.37 ms
<b>Google PageSpeed</b>	51.00 /100
- <b>First Contentful Paint (FCP)</b>	0.8 s
- <b>Largest Contentful Paint (LCP)</b>	8.0 s
- <b>Time To Interactive (TTI)</b>	0.8 s

# Updates

We Keep Your Core, Plugins and Themes Updated to Their Latest Version.

In our world of amazing technology, updates are crucial for strong performance and security. The WordPress platform is being tested and updated on a regular basis for the best possible performance and to avoid any security loopholes. Just like the updates for our phones, these WordPress updates reduce the number of security issues, and maintain a positive user experience on your website.

## WordPress Core

 WordPress core is at the latest version.

## Plugins Updates

Plugin	Version	Updated On
Complianz   GDPR/CCPA Cookie Consent	6.5.5 → 6.5.6	December 28, 2023
SureCart	2.11.4 → 2.14.1	December 28, 2023

## Themes Updates

Divi	4.23.1 → 4.23.3	December 28, 2023
Divi	4.23.3 → 4.23.4	December 31, 2023

# Backups

We Backup Your Website On A Regular Basis For Peace Of Mind.

A backup is the main guarantee that your site can be completely restored after any problems and crashes. A site backup helps if you inadvertently delete some important elements, a theme or plugin/module harms your site, or if the website is hacked. That's why we always keep several backups of your website.

 Your website is backed up.

<b>Number of Backups</b>	0
<b>Last Backup</b>	-
<b>Backup Frequency</b>	None

# Site Health

Making sure that your website stays safe and indexable by Search Engines is our top-priority.

If you don't have an SSL certificate, your website may still function as always but it will be vulnerable to hackers and Google will warn visitors that your website is not secure. Google also gives priority to websites that have an SSL certificate. We make sure that your website has an SSL certificate and that your website operates in a healthy environment.

<b>SSL Certificate</b>	
<b>Indexable</b>	
<b>PHP Version</b>	8.1.26
<b>PHP Version is Secured</b>
